

Functional Programming with Scala

Project Title: Test Project

Group Name: Group 10

Germani Nicolas

IG5.Polytech

November 19, 2024

- **Your Specific Contribution:**

- I tried to make the connection with Neo4j. Once that was done, the plan was to share the remaining tasks once ours was finished.

- **Methodology or Approach:**

- I created a new Atlas project and a new collection. After I tried the create the connection with Atlas.

- **Challenges Faced and Their Resolutions:**

- I encountered a problem with dependencies that did not want to install. However I tried a lot of things with the built.sbt file but nothing worked. The problem could not be resolved.

- **Learning Gained:**

- In this project I did not learn anything but in this subject, I learned a good basis in functional programming as well as the use of tools such as Neo4j.

- **Future Improvements:**

- With more time to resolve our respective bugs, I could finish this small task and implement all the asked features.
